

The Road to EU

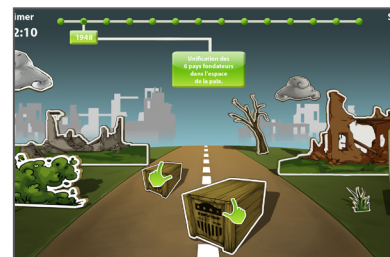

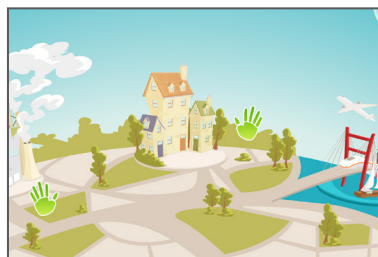

If you feel like you're losing grip when it comes to European concerns and history, don't worry, The Road to EU will fill you in through a playful series of interactive games.

Europe is everyone's business. Have your say. Become an actor of the collective future... By understanding the past and present! The first mode of play, "border game", raises the player awareness about how Europe was built through a succession of "historic" milestones (1941-2010). Move debris apart and rebuild, make way through a virtual border guarded by soldiers -- These are only a couple of examples of situations you'll get to play.

Paint the town green! Make your town a clean, environmentally-friendly place.

- Green industrialization: upgrade your factories, use green energies;
- Micro-generation: insulate your own home, reduce your domestic consumption and opt for green energy providers.
- Transportation: use public transportation to lower your carbon footprint....

Last but not least, "Cast a Vote" underlines the player's very important role on a European level as far as elections are concerned. Every single vote counts in common European politics

Objectives of the serious game :

- Test your knowledge of EU in a playful manner
- Brush up the historical milestones of EU
- Interact through Kinect
- Learn how to contribute as a euro-citizen
- 3 mini games containing several levels each
