

Master F.I.N.D

Master F.I.N.D is a serious game based on the analyse of actions you take on social networks and the consequences that could result of them. With this game, Child Focus wants the player to think about the notion of private life on the internet, the importance of not publishing too much personal information, having a good password, knowing your virtual friends in real life, thinking before publishing and much more!

The player will become a web expert by fighting the cybercriminality. Helped by a group of web-detectives from the network F.I.N.D, he'll infiltrate the social network, e-Talk to find clues. The clues will be analyzed with high tech superpowers to bring back peace to the network. He'll have to run an investigation and solve a lot of missions to save the private life of the internet users ! Would he be able to become the Master F.I.N.D ?!

Objectives of the serious :

- Thought on the notion of privacy
- The importance of a good password
- Learn to choose your virtual friends
- Think before publishing
